Hiring Manager

Jumia

Dear Hiring Manager,

I am writing to express my enthusiasm for the Back-end Internship position at Jumia, as advertised. With a strong passion for back-end development and a keen interest in PHP Laravel, I am excited about the opportunity to contribute to your dynamic team environment.

Throughout my academic journey at Helwan University, where I pursued a Bachelor of Communication and Information, I have honed my skills in back-end development, particularly in PHP Laravel. One of my notable projects, the "Tamweeny Ecommerce System," demonstrates my ability to develop efficient and scalable web applications, employing features such as user authentication, product management, shopping cart functionality, and role-based access control.

In addition to academic projects, I have actively engaged in practical endeavors, including the development of real-world applications like "Larazillow," a real estate listing web application, and "Flutter Laravel API Project," a cross-platform Flutter app with a Laravel backend. These experiences have equipped me with proficiency in RESTful API development, secure authentication mechanisms, and database management.

Furthermore, my internship experience at the Information Technology Institute as a Data Analyst has provided me with valuable insights into handling and analyzing datasets, extracting meaningful insights, and presenting findings effectively.

I am particularly drawn to Jumia's commitment to innovation and its pioneering role in the e-commerce sector. I am eager to leverage my skills and passion for back-end development to contribute to Jumia's success and to continue learning and growing alongside your talented team.

Thank you for considering my application. I am looking forward to the possibility of discussing how my background, skills, and enthusiasm align with the needs of your team. Please find my resume attached for further details. I am available at your convenience for an interview.

Warm regards,

Abdallah Fawzi
